(GROUP ASSIGNMENT - 12)

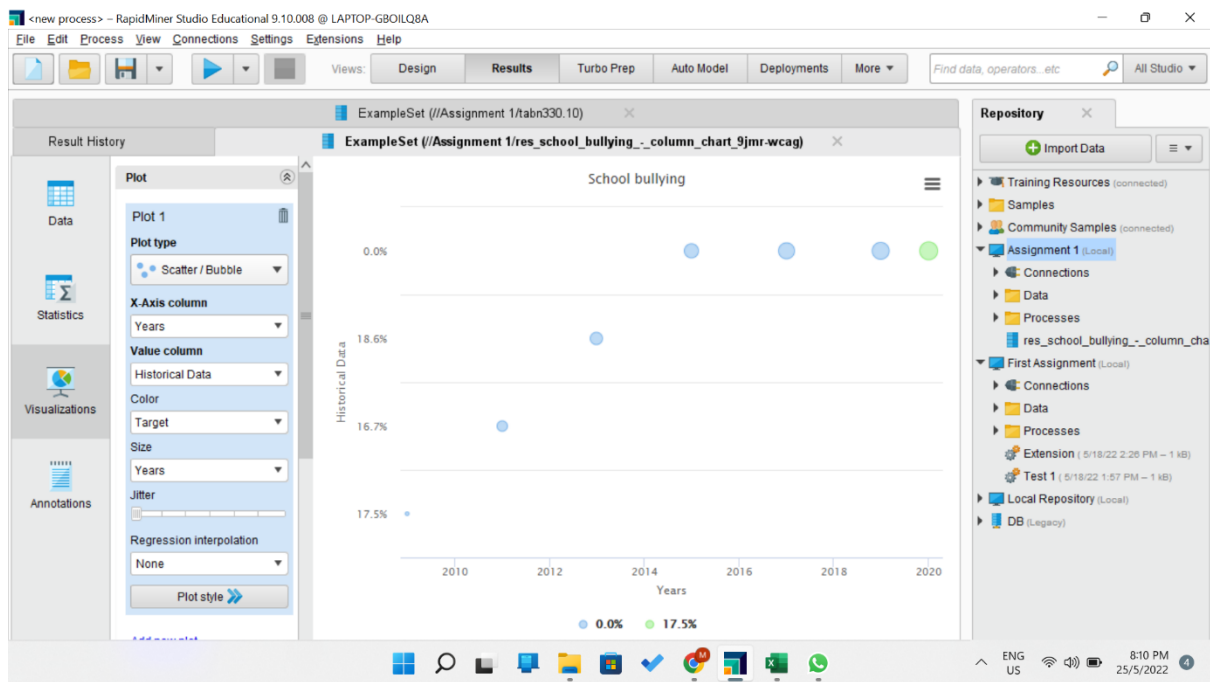

RAPIDMINER

Find or build any excel file that contains interesting data that your group prefers (Bonus if it is related to your life as a student). Then import it into RapidMiner Studio and use the visualization tools to come up with any interesting findings/observations that you discover. Save it as an image file and post it in Microsoft

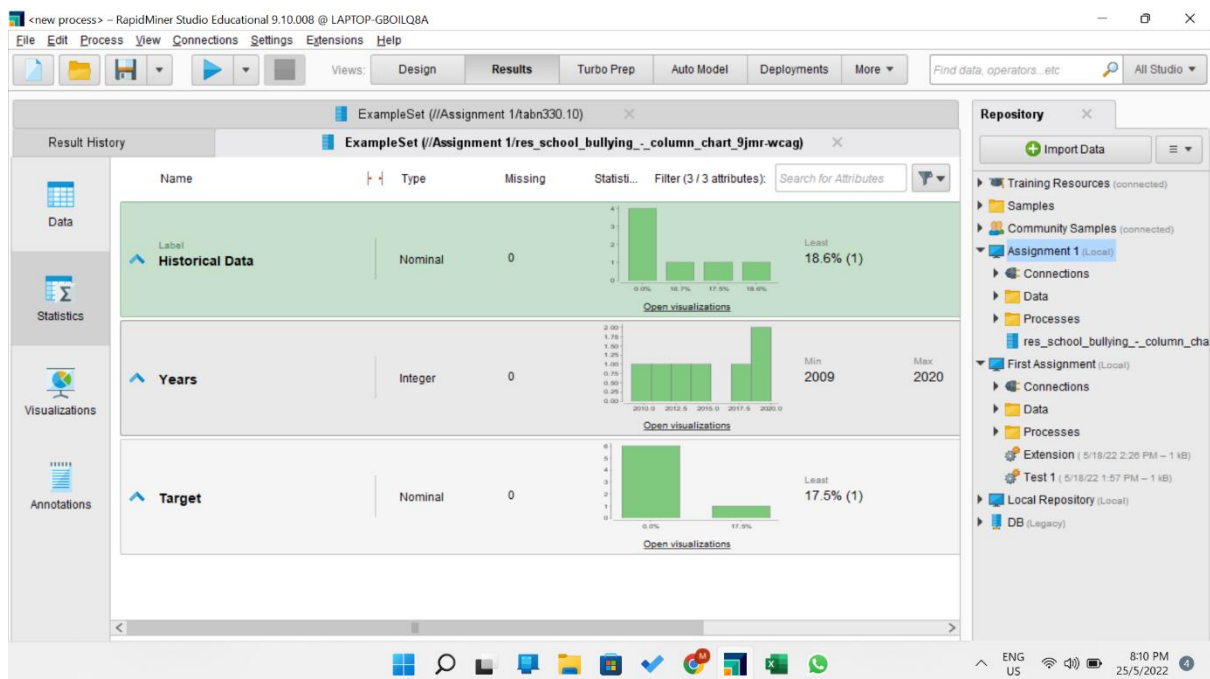

Word together with your own comment on what you found.

Plot Scatter/Bubble (School Bullying)

Statistics (School Bullying)

The finding data based on the number of school students who report they were bullied at school. The data include years, historical data and target. The data were collected from 2009 to 2020. Based on the observation by import and visualization this data, the interesting

information we get is the percentage of first 2009 to 2013 was increased suddenly the number of school students who report they were bullied on school from 2015 to 2020 was decreased. In conclusion, it is possible that the school takes appropriate action and uses some strategies to control and reduce the incidence of bullying in school.
