HUMAN COMPUTER INTERACTION (MMG 3033) SEMESTER 2 SESSION 2020/2021

GROUP PROJECT

Incorporate your findings in Assignment 1 into a full paper prototype that illustrates the study scenario as described in Figure 1.0. Sketch appropriate display design (interface) representing overall views of your screen that suits all types of users either novice, intermediate, expert or disabled people. Each navigational screen (from one screen to another screen) must be shown. Your design should abide Nielsen and Molich's 10 User Interface Design Guidelines. The examples of paper prototype is as follows:

- <https://www.youtube.com/watch?v=y20E3qBmHpg>
- <https://www.youtube.com/watch?v=VLhkgQsEhmc>
- <https://www.youtube.com/watch?v=N20XFLQO0ts>
- https://www.youtube.com/watch?v=x48qOA2Z_xQ
- <https://www.youtube.com/watch?v=dt1bQsZ68iw>

Coming up with a good idea, and knowing when and having the courage to switch ideas when you discover one is not good, is one of the biggest challenges in this design process. Focus on the metaphor your group are trying to communicate to the user, and think about the requirements you have identified, as well as your task analysis: what does the user need to do and how will your video help them do it? Your final solution needs to go beyond what is currently available in the market. One way to figure it out is that your project should be:

- Creative.
- Original.
- Non-obvious.
- Have a "wow" factor.

Note:

- The incourse work is to be completed as a piece of cooperative and collaborative group work. You need to work in a team of 4 members, or in **exceptional** cases, 5 members.
- Your group are required to present and submit the recorded video of Assignment 1 and Group Project into MyGuru platform. Only group representative needs to submit, but please make sure all group members' name are included.
- Please submit your work including all related documents on Week 14.

Together we will stop its spread!

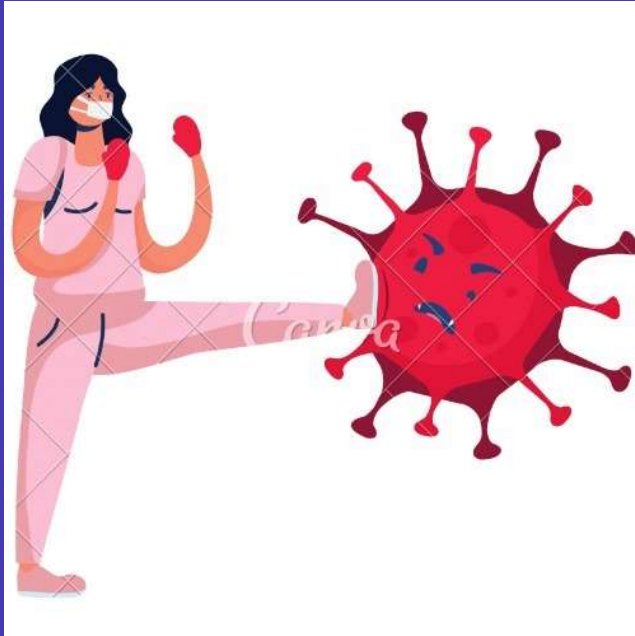

COVID-19

”

COVID-19 is a disease caused by a new strain of coronavirus. 'CO' stands for corona, 'VI' for virus, and 'D' for disease. Formerly, this disease was referred to as '2019 novel coronavirus' or '2019-nCoV.'

WHEN

”

On 31 December 2019

WHERE

”

WHO was informed of cases of pneumonia of unknown cause in Wuhan City, China. A novel coronavirus was identified as the cause by Chinese authorities on 7 January 2020 and was temporarily named “2019-nCoV”.

Precaution and Prevention

We must have an education to this pandemic

Clean your hand often by sanitizer and wash with water

Avoid crowd and maintain distances (1 Meter)

Always wear a face mask.

HOW TO GET VACCINATED

With

MySejahtera

HOW

Step 1

-make sure your app is downloaded and updated to the latest version on the App Store or Google Play.

[NEXT](#)

Once you've updated your app, relaunch the MySejahtera app and you should be able to see a 'COVID-19 Vaccination' button on the home screen. Tap on the button and make sure your personal details (name, IC, phone number) are accurate.

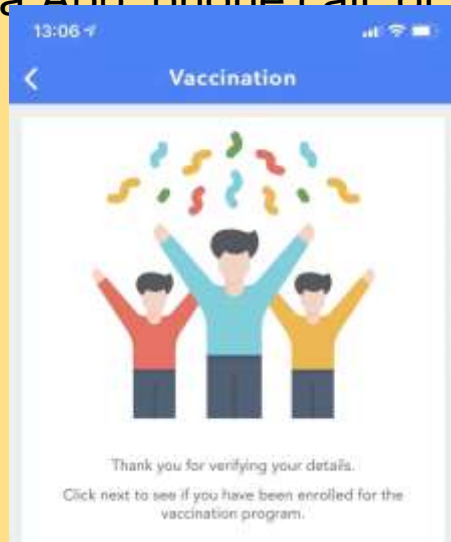

NEXT

Step 3

-Once your details are verified, you'll be led to this frame. Click on the 'click here' link to complete your registration by filling up a form with 4 simple yes/no questions. Once you've done so, you'll be notified when the next phase of vaccination begins (details about the vaccination center and dates assigned will be sent to you via the MySejahtera App, phone call, or text).
